

The National Citizen Survey™

Jackson County, MI

Dashboard Summary of
Findings

2014

Summary

The National Citizen Survey™ (The NCS) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents’ opinions within the three pillars of a community, Community Characteristics, Governance and Participation, across eight central facets of community, Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement. This report summarizes Jackson County’s performance in the eight facets of community livability with the “General” rating as a summary of results from the overarching questions not shown within any of the eight facets. The “Overall” represents the community pillar in its entirety (the eight facets and general).

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of Jackson County’s community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Compared to other U.S. communities, residents identified Community Characteristics and Participation in Jackson County favorably. Specifically, Participation ratings in the areas of Safety, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement were similar to the national benchmark. Within Community Characteristics, ratings for Safety, Mobility and Natural Environment were also similar to other places in the nation. Ratings for Governance measures were lower, with the majority of services scoring lower than in comparison communities. This information can be helpful in identifying key areas that merit more attention.

Figure 1: Dashboard Summary

	Community Characteristics			Governance			Participation		
	Higher	Similar	Lower	Higher	Similar	Lower	Higher	Similar	Lower
Overall	0	21	31	0	4	42	1	27	8
General	0	1	6	0	0	3	0	1	2
